RE: Prospect Avenue Construction

Phase 1 – Seminole Road to Bartell Drive & Oakcrest Drive to 250 feet north of Haskell Street

To: All Residents / Business Owners

Vinton Construction Company will be starting Phase 1 of the Prospect Avenue reconstruction project on Monday, March 30, 2020.

During Phase 1 construction, work will begin with storm sewer improvements, which will immediately be followed by existing pavement removal, excavation and removal of old road base and installation of new gravel road base. During these operations, access will be maintained to your driveways except when work is being done directly in front of your residence. We will do our best to complete our work as quickly as possible and restore your access by the end of each work day. When work is taking place at or near an intersection, you may only be able to access your residence from one direction or the other. We ask that you be observant of where we are working and plan your trips accordingly.

As the project continues to progress, additional notices such as this one, will be placed in your door to make you aware of what is coming up next on the project. Please check your door regularly for these notices throughout the duration of the project to keep informed of the most current information.

I apologize in advance for the inconvenience. Your cooperation and patience during construction is greatly appreciated.

If you have any questions or concerns, please feel free to contact me at the phone number and/or email listed below.

Thank You,

David Strelcheck
